Grow Your Own Food!

The Chas. C. Hart Seed Co.
WETHERSFIELD 9, CONN.

SPRING
1948

Dear Friends:

As we approach the year of 1948, we do so with mingled emotions regarding the food situation of the world. Happy, perhaps that through our good fortune we have sufficient food for our domestic consumption without fear of drastic want, but sad in the thought of dire stress and starvation which has faced so many millions of peoples throughout the world.

We have all endeavored to cooperate with our government in regard to lack of waste, now we believe the time has arrived when we must give serious consideration to increased production. Weather conditions have not been favorable for the production of many of our essential foods, and we may face a serious shortage in 1948 if our important grains such as wheat do not winter well. Lack of grazing grass for cattle during the Fall, because of dry weather, will further the shortage of meat, it is reported by those in authority.

As the food picture does not look altogether bright, our Government is asking for an increased number of Freedom Gardens in 1948. Those of us who have produced our own vegetables during the war period well know the monetary saving which we have effected, and of the superior quality which we produce. With this effort we can help ourselves and help a hungry world.

In our 1948 seed catalog, we have endeavored to list those varieties which in our opinion are most adaptable for your requirements. We have limited the size of our catalog and have discontinued inside color work to conserve so that we may offer our products more reasonably than we could do otherwise.

We are prepared to fill your order promptly with seeds of very highest quality and hope to have the pleasure of serving you this season.

HART'S LAWN GRASS SEEDS

New! Convenient!

5 QUALITY BRANDS—BOXES IN 1, 2 and 5 LBS., ALSO AVAILABLE IN 10, 25, 50 and 100 LB. BAGS

This is the modern way to buy lawn seed because you can buy a dependable brand with the quality and contents clearly labeled. You'll like the box because it's easier to handle, and protects unused seed better. We offer these 5 quality brands boxed.

HART'S STANDISH PARK (GOLD SEAL) meets the exacting requirements of the State of Connecticut and is fully qualified to bear the State Seal of "Highest Quality." The basic turf grass seeds used are as nearly 100% pure as the most modern cleaning machinery can make them. The lawn resulting from this seed will present an ideal appearance.

HART'S BLUE SEAL bears the "High Quality" Seal of the State of Connecticut, and produces dense, thick turf with a thrifty root system which insures long life and resistance to rough usage. While it does not meet the exacting standards of **Gold Seal**, it produces a turf similar to that fine blend. For best results, sow in Spring or Fall.

HART'S RED SEAL is rated "Good Quality" under State specifications and contains a higher percentage of quick growing grasses than the other Seal Blends, although the permanent grasses are in somewhat smaller supply. Highly valuable for late Spring or Summer seeding. Produces excellent turf under adverse conditions.

HART'S ELM TREE LAWN SEED is named for the famous Wethersfield Elm. The ingredients are similar to those of the State Seal blends but they are not as highly refined. It is rapid growing yet permanent and produces a rich, velvety turf. May be sown at any season, under all conditions.

HART'S SHADY PLACE is a very superior blend of hardy, deep-rooted grasses designed for permanent turf

on lawns which have more shade than sun. Will give good results under trees or on the north side of buildings. We also offer

EVERGREEN. Satisfactory for the average lawn, but simply does not contain as large a percentage of the finer bladed, more desirable grasses, or is the purity quite as high as in the State Seal mixtures.

POOR, or SANDY SOILS BLEND will thrive on soils of that type.

TERRACE SOD is useful on embankments and steep slopes.

DEEP SHADE is for use in densely shaded locations only.

SPECIAL BENT AND SPLENDOR (GOLD SEAL) are adapted for spots where an ultra-fine turf is desired.

Feed Your Plants Properly With ES-MIN-EL

Es-Min-El gets its name from three important words—ES-sential, MIN-eral, EL-ements. It supplies those elements which are normally lacking in the soil. It is not a fertilizer, but a fertilizer supplement.

Es-Min-El is a carefully balanced and easily soluble mixture of the mineral elements needed by fruits, vegetables, flowers and field crops for healthy and profuse growth. They can be no better than the soil in which they are grown—so if needed minerals are missing, crops will fail. Through the application of Es-Min-El this condition can be corrected.

Best results are obtained when Es-Min-El is used in combination with a good commercial fertilizer before planting. Fifty to seventy-five pounds of Es-Min-El spread broadcast will mineralize one acre; one cupful will mineralize a garden plot ten feet square.

Sold in convenient 5- and 100-lb. bags.

What users of Es-Min-El say about it:

Phoenix City, Alabama

...“got the most outstanding and noticeable effects on tomatoes when I used Es-Min-El.”

Crown Point, New York

...“Cabbages weigh over ten pounds.”

Montclair, New Jersey

...“the carrots are a wonderful color and flavor.”

Raleigh, North Carolina

...“fruits and vegetables taste better.”

Woodsville, New Hampshire

...“Finest crop of tomatoes and cucumbers.”

Waterville, Maine

...“no cracking around stems of tomatoes.”

ES-MIN-EL

Highly beneficial for flowers either in hot houses or out of doors.

—Fruit and nut trees respond especially well.

—Can be used on all vegetable crops.

—Can improve lawns, golf greens and pastures.
